

I feel that the use of cell phones in the air should not be allowed!!! As a flight attendant I feel not only would it not be safe, it could cause passenger conflict. It is hard enough to get passengers to listen to our briefings when they can't use phones, I can't imagine what it would be like if they could. What if there was an emergency in flight and we needed their attention we would have to fight with them to get off the phone and that could waste valuable time. Besides as a passenger who wants to sit next to someone for 4 hours or more talking on their cell phone???
